COLEJIO ANGLO PORTEÑO.

205—Calle Maipu—205

This school has been established for several years and is well known in the city.

No pains are spared to make the Colegio in every case equal to its pupils and the instruction it affords.

Parents are respectfully invited to visit the School, and to peruse at the monthly reports of its several departments.

The English, Spanish, and French languages are taught by native masters of experience, and every week or two a lecture on some subject is delivered in either of these languages.

Day pupils can be received at any time and in fewer will be examined before boarders or full boarders.

June 25th 1862.

SHEEP—SHEEP—SHEEP

Importers, to Sheep Farmers.

Learn every for the Sea[illegible]

The undersigned has the pleasure of announcing to the Wool Growers of this country, that he has now in receipt a large supply of the celebrated *South Down Sheep Wash.*

This valuable preparation is highly recommended for Scab, every parasite and economy. It is a non-poisonous extract, one pound of which is equal to ten pounds of fish oil, requiring no more than one part of the proportion of the raw material as the usual thing among the very cheapest and inferior soaps and oils of commerce, he thus has it in his power to supply the country. The very lowest rates, with its active properties of the public, to test the same in the quantity of one pound to fifty thousand gallons of water, and if it fails to show as good results as any other soap or wash in the market, he will not require payment for it.

At Messrs. *Anderson Bell and Co's*, Defensa, corner Monserat.

The most satisfactory references can be given of the effect of the article, and the undersigned will be glad to call upon the purchasers, if required.

THURSDAY, JULY 8, 1852

Sickness in B. Ayres.

It is not generally known the alarming amount of sickness which at present rages in this city. Owing to the incessant rains, and warm, unhealthy atmosphere, our citizens are getting knocked down like nine-pins in a row. In the English hospital, we are informed there is not room for another patient. In the native hospitals things are in the same state: one hospital has at present over 800 patients. Scarcely a block in town in which the doctor is not a daily visitor.

Buenos Ayres is, literally speaking, Malos Ayres. A few weeks of rainy weather, and half the population is either confined to bed, or the next thing to it. .

Why, if it rained as much in this city as it does in Dublin, the population of Buenos Ayres, in 1861, would be zero.

This city abounds with both native and foreign doctors, some of whom think no small beer of themselves, yet which we have not one medical man who comes forward to trace the cause or origin of all this sickness, and explain to the public why Buenos Ayres is becoming more and more unhealthy.

In wet weather, there is positively no living in this city with the damp; it enters, as it were, into the very marrow of one's bones. Take what precaution one will, keep the best English coal burning in every room in the house, keep all the doors and windows shut, the result is the same, everything feels damp; and this dampness is what sickens the population; which dampness that is breeding all sorts of diseases amongst us.

It is a serious thing to make a charge against a corporate body, but more serious still, to remain silent to the Residents passing by, day after day.

If we had coroners in this country, we might insist upon his holding an inquest held on the bodies of the [illegible] every week, in order to ascertain what was the cause of their death, and by that means we would be in a position to see what the grossly neglected state of the Municipality is, in allowing Buenos Ayres to this day without sewerage or drains, is the cause of it all.

When it rains here, there is no place for the water to run to; it soaks into the earth, as a natural consequence. The same way with all the dirt and filth of the city; there is no drain to carry it off. There it lies, probably down in the bottom of some deep well, which for years has been left uncleaned. The effluvia which those sinks of filth emit is enough to poison the whole city.

Who, if not the Municipality, are answerable for all this? Who should see to the drainage of the city, if not the Municipality?

We have been informed that there is before this board a plan for supplying the city with proper sewers in all the principal streets; but how long it is to remain on their table we cannot say.

This is the second time we have had to call the attention of the public to this matter. We hope the subject will be taken up [illegible] have to go in mournful, or others go [illegible]

Artesian Well.

Report of the Committee.

Buenos Ayres, June 28 de 1852.

To His Ex., the Governor of the Province, General Don Bertolomé Mitre.

Excellency.

The Committee entrusted with the report of the Artesian works of Messrs. Sourdeaux, Legout and Co., has judged it convenient to make known to you the principal circumstances of the discovery lately made by those gentlemen at Barracas. Afterwards it will endeavour to satisfy the noble desires of the Government, entering into considerations which are not for the present opportune, and which will be made as soon as we shall have obtained more detailed information of the borings and samples of the bed traversed, the knowledge of which is indispensable to form a judgment upon the geological structure of the land from which these artesian waters emanate; and also when it shall have determined in a positive manner the situation of the strata with of the pit with regard to the neighbouring river or known heights; when finally it shall have been made from the analysis and sufficient analysis of said waters. This it will not hesitate to [illegible] in Y. Ex. hands a document which may stand the examination of competent persons and now the solemnity with which the Government of Buenos Aires, in procuring the material welfare of the people, at the same time endeavours to push on the progress of science and arts.

In the meantime the Commission has the honour to make known to Y. E. that in virtue of the observations made the 19th instant, & of subsequent experiments on the nature of the liquid obtained, it results.

1st. That at the height of 87 centimetres [illegible] the ground, [illegible] from the surface of the [illegible] on which [illegible] centimetres [illegible] metre square, [illegible] hundred and ten [illegible] each of 30 litres equivalent to 3300 litres, or 110 imperial gallons approximately.

2nd—The column of [illegible] is in a state of [illegible] the [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] centimetres; about 5 ft 11 inches over the ground.

3rd—The water, in issuing from the [illegible] not perfectly [illegible] [illegible] in accordance with the [illegible] which [illegible] which it yet brought in suspension, but after a short [illegible] acquired the most complete crystalline state.

4th—The turbid matter was composed of fine quartz sand and of small lumps of carbonate of lime and magnesia.

5th—The temperature of the water was found to be of 21 centigrades at being worthy of notice that of a common well, and the mean temperature of the atmosphere in Buenos Aires is of 16.

6th—The water a few [illegible] being taken and well boiled was [illegible] and found to contain [illegible] of air, that is to say it rather contained more than the waters well tried, of its contain from 15 to 20.

7th—The same Artesian water placed in contact with a soapy solution, was not rendered turbid at once, but half an hour after several [illegible] were observed [illegible] [illegible] from which it may be inferred that the water carries up with high red metal [illegible] [illegible] [illegible] [illegible] [illegible] [illegible]

Spain.

Queen Isabella is approaching her confinement. Marshal O'Donnell has not defined his policy very clearly in the Mexican question: he has nominated his late campaign is arms, Gen. Echagüe, of the African campaign, Capt. Gen. of Manilla. A flotilla of 4 war steamers has been ordered to South America. We learn that General Serrano has sent a commander to supersede Prim, Count of Reus, who retired, with the English fleet, from Vera Cruz. The Spanish army, just arrived from Tetuan, counts 633 officers, 19,000 men, and 1300 horses, and brings 20 million reals of Moorish indemnity. The Duchess de Montpensier is about to give birth to another Bourbon.

LOCAL EVENTS.

Western Railway.

The report of this Company for the month of May ultimo offers the following figures.

Passengers on the line	30,243
Value of their fares	$ 201,617
Freight on cargo	81,494
Expenses during the month	196,326
Nett proceeds	86,785

THE MENAY —Owing to the bad weather this steamer it appears could not leave Montevideo until last evening.

She is due to-day and returns this evening.

SHEEP SEALS.—The period having expired for renewing the boletos for sealing, we understand that the Government intend to extend the time until the 1st October; this would be only right and proper, as the rools are so bad, and the horses so thin that it is perfectly impossible for many of the sheep farmers to leave their places.

OPERA.—We read in an Italian paper that Mdlle Solon a native of Montevideo has made her debut in La Scala, Milan.

WESTERN R. R. Co.—A neatly got up blue book has been presented to us by one of the Stock-holders of the R. R. Company, we do not find time to get through it yet but do not doubt at all that before we finish it, we shall be convinced the Stock is worth $500 per cent above par.

STEAMERS.—The Espigador is due to-day from Rosario.

The Paron is due to-day from Rosario

The Libertad leaves this evening for Montevideo.

POLKA.—To day we understand the manager of this establishment will be appointed.

PODCANORRA.—We understand this opera will be re-produced some evening this week. Those who purpose seeing it should buy the libretto on sale at Colon. We defer a review until to-morrow morning. An apology is due to the orchestra, as we are told by the highest authority that they acquitted themselves creditably on Sunday evening.

STEAMER CONSTITUCION.— This vessel has been hired by Sr Canseras who intends to commence running her between Buenos Aires and the Uruguay ports.

MUNICIPALITY.—As usual no quorum. We understand future meetings should be convened with the cautical P. S. Weather permitting.

BRITISH HOSPITAL.—We published yesterday the replies to the charges made against this institution, which were the more singular as being advanced by Englishmen subscribers assertions regarding the poor are false, and if it cannot be proved that there is color to the 19,000 dollar stove, we must believe that our columns have been turned to private purposes of jealousy.

POSTAL DELAY.—Yesterday we received our papers from Europe, brought by French packet. This is too bad.

IRISH IMMIGRANTS.—We learn that the Raymond from Dublin brings 200 passengers, who may be expected next month.

On Change.

July 2nd 1862.

To-day everything was dull—even ounces were devoid of animation, opening and closing at 424 1/2.

Owing to the wet and muddy state of the plaza—there were no sales whatever—country produce effected—buyers do not even go near the plaza, and holders are compelled to suffer all sorts of inconveniences from the weather, the carmen and the commissaries. A small quantity f mix-d wool, lying in the station, was sold—@$6.

We notice considerable arrivals of wheat—the reaize by the train; which meet with immediate sale at current rates.

The slight improvement in the European wool markets has as yet no perceptible effect here, although the holders of decent wool show every disposition to realise.

On change to-day little was talked of, save politics and the weather; bus ness may be fairly said to be a stand still the importers complain, but collections are not enable and that to effect sales goods must be put under the auctioneer's hammer.

Last week's ary goo's sale by one of our leading importers, was effected by auction, to the extent of one million currency prices we understand were rather good.

Trade auction sales, although in some places very successful, can never be regarded here in any other light than forcing the market, and must be attended (when bona fide) with considerable risk to the importer.

The Government proposal in reference to extending the Buenos Aires Custom House regulations to all the provinces meets with the approval of most men of business, but the foreign merchants in resident, a very serious grounds of complaint against the insufferable method of doing business in the Custom House in Buenos Ayres.

Money is rather abundant in the sole which is present, and per cent on discount the investing in such tempting securities as g.s and Western R.ilway shares find a difficulty in employing their surplus funds, except by deposoiting in the Bank.

We remark that latterly a good deal of paper A. N. A. is being discounted outside the Bank, this is a good healthy sign in our money market, for it clearly proves that the Bank monopoly is fa ling by degrees.

The new English Bank, which we noticed was in process of formation, is as yet in Statu quo

ARRIVALS AND IMPORTS

CLEARED.

Bahia, Brazilian brig Mariuha 2.8 by Llavallol and Sons, with 3500 qu. jerked beef, 60 dry hides, bales.

SHEEP—SHEEP—SHEEP

Importers, to Sheep Farmers.

Learn ever for the Soul can Sin.

The undersigned has the pleasure of announcing to the Wool Growers of this country, that he has now in receipt of a large supply of the celebrated *South Down Sheep Wash.*

This valuable preparation is highly recommended for Scab, very powerful and economy. It is a non-poisonous extract, one pound of which is equal to ten pounds of fish oil, requiring no boiling, but merely the dissolution of the raw material in the water, using the very coldest and softest water at hand. The success which this wash has already had in this country. The many letters received with its sale, is sufficient to establish its merits. Directions for preparing and using will be found on the bottle. Sold by the undersigned and by every respectable storekeeper throughout the Argentine Republic. Also, the celebrated Hair Dye, which is now in general use throughout the United States, Canada, and Europe, and is the only one that can be relied on to produce a natural color. Sold by all respectable Perfumers, and in Montevideo.

The most satisfactory references can be given of the effects of the above articles, and the undersigned will be glad to receive applications from parties desirous of becoming agents for the sale of the same.

THE LARGEST

WOOLYARD IN TOWN.

Messrs. Hall & Co. beg to inform the public that they have their large and commodious premises, No. 117, Piedras, in complete order for the reception of wool, and have made such arrangements as will enable them to give every facility to parties favouring them with consignments.

Messrs. Hall & Co. have also a large and well-assorted stock of Groceries, Provisions, Wines, Spirits, Ales, Cigars, &c., which they are selling at the lowest possible prices for cash.

Buenos Ayres, 1st July 1862.

GEORGE BELL and SON

ENGINEERS, MILLWRIGHTS

SMITHS, &c.

117—Piedras—117

Beg to inform the Public that they have commenced business in the above line of business at the premises recently occupied by Messrs. Hall & Co., where they will be prepared to execute all orders entrusted to them with punctuality and despatch.

Having had many years experience in the above line of business, they trust by strict attention to merit a share of public patronage.

Buenos Ayres, 1st July 1862.

PUBLIC NOTICE.

77—PERU—77.

The wholesale and retail English

Grocery Store,

CALLE PERU, No 77,

For many years favourably known for its excellent family assortment, and despatch, has changed proprietors.

The present owner invites inspection of the well assorted stock which he has on hand, at moderate rates, and which he hopes will meet the wishes of all who favour him with their kind patronage.

THURSDAY, JULY 5, 1860

Sickness in B. Ayres.

It is not generally known the alarming amount of sickness which at present rages in this city. Owing to the incessant rains, and warm, unhealthy atmosphere, our citizens are getting knocked down like nine-pins in a row. In the English hospital, we are informed there is not room for another patient. In the native hospitals things are in the same state: one hospital has at present over 800 patients. Scarcely a block in town in which the doctor is not a daily visitor.

Buenos Ayres is, literally speaking, Malos Ayres. A few weeks of rainy weather, and half the population is either confined to bed, or the next thing to it. .

Why, if it rained as much in this city as it does in Dublin, the population of Buenos Ayres, in 1861, would be zero.

This city abounds with both native and foreign doctors, some of whom think no small beer of themselves, yet which we have not one medical man who comes forward to trace the cause or origin of all this sickness, and explain to the public why Buenos Ayres is becoming more and more unhealthy.

In wet weather, there is positively no living in this city with the damp; it enters, as it were, into the very marrow of one's bones. Take what precaution one will, keep the best English coal burning in every room in the house, keep all the doors and windows shut, the result is the same, everything feels damp; and this dampness is what sickens the population; which dampness that is breeding all sorts of diseases amongst us.

It is a serious thing to make a charge against a corporate body, but more serious still, to remain silent to the Recolets passing by, &c. &c. &c.

If we had coroners in this country, we might insist upon a legal inquest held on each of the victims of the present sickness, in order to ascertain the cause of death, and by that means we would be in a position to see if that the gross neglect of the Municipality in leaving Buenos Ayres to this day without sewerage or drains, is the cause of it all.

When it rains here, there is no place for the water to run to; it soaks into the earth, as a natural consequence. The same way with all the dirt and filth of the city; there is no drain to carry it off. There it lies, probably down in the bottom of some deep well, which for years has been left uncleaned. The effluvia which those sinks of filth emit is enough to poison the whole city.

Who, if not the Municipality, are answerable for all this? Who should see to the drainage of the city, if not the Municipality?

We have been informed that there is before this board a plan for supplying the city with proper sewers in all the principal streets; but how long it is to remain on their table we cannot say.

This is the second time we have had to call the attention of the public to this matter. We hope the subject will be taken up before we *all* have to go in mourning, or others go in mourning for us.

Artesian Well.

Report of the Committee.

Buenos Ayres, June 28 de 1860.

To His Ex., the Governor of the Province, General Don Bartolomé Mitre.

Excellency.

The Committee entrusted with the report of the Artesian works of Messrs. Sourdeaux, Legout and Co., has judged it convenient to make known to you the principal circumstances of the discovery lately made by those gentlemen at Barracas. Afterwards it will endeavour to satisfy the noble desires of the Government, entering into considerations which are not for the present opportune, and which will be made as soon as we shall have obtained more detailed information of the borings and samples of the bed traversed, the knowledge of which is indispensable to form a judgment upon the geological structure of the land from which these artesian waters emanate; and also when it shall have determined in a positive manner the situation of the strata with of the pit with regard to the neighbouring river or known heights; when finally it shall have been made from the analysis and sufficient analysis of said waters. Then it will not hesitate to submit to Y. Ex. hands a document which may stand the examination of competent persons and about the solidity with which the Government of Buenos Aires, in pursuing the methodical line of the people, at the same time endeavours to push on the progress of science and arts.

In the meantime the Commission has the honour to make known to Y. E. that in virtue of the observations made the 19th instant, & of subsequent experiments on the nature of the liquid obtained, it results.

1st. That at the height of 87 centimetres from the ground, from the bottom of the pit, and through a tube of 0m.108 millimetres equivalent to 4 inches and 10 lines precisely, flows a hundred and ten pipes, each of 25 cubic metres equivalent to 110 imperial gallons approximately.

2nd—The column of water is in a state of pressure sufficient to throw the water to the height of 8m.45 centimetres; about 9 ft 1 yard over the ground.

3rd—The water, in issuing from the tube was not perfectly in point of clearness in accordance with the tests made with the Nessler reagent, which yet brought in suspension, but after a short repose, acquired the most complete crystalline state.

4th—The turbid matter was composed of fine quartz sand and of small lumina of carbonate of lime and magnesia.

5th—The temperature of the water was found to be of 21 centigrades at being worthy of notice that of the common wells, and the mean temperature of the atmosphere in Buenos Aires is of 16.

6th—The water a few hours after being taken and well boiled was scarcely deposited some traces of the mass of air, that is to say it rather remained upon the surface. It was known that drinks with waters well aired, of an certain hour 20 to 20.

7th The same Artesian water placed in contact with its empty solution was not rendered turbid at once, but half an hour after several white flakes were observed to fall, which afterwards in the course of 24 hours formed a thick white precipitate.

8th The water having been placed in contact with acidulated chloride of Bario, there was an abundant reaction showing the presence in it of sulphuric.

9th. The acidulated nitrate of silver used as a reactive likewise produced an abundant deposition, characteristic of a corresponding ingredient of chlorides in the analysed liquid.

10th. The phosphate of ammoniacal soda, occasioned a very sensible precipitation of magnesia.

11th. The oxide of ammonia produced a slight precipitate of lime.

From the latter observations and as stated before, abstaining for the present from enquiring into the exact relation of weight and volume respecting each other in the salts discovered, the natural inference may be drawn that it contains in solution an alkaline Chloride (probably of sodium) a sulphate of lime, and another of magnesia the latter in sufficient quantity. All of which accounts for the somewhat disagreeable taste of this water and allows the committee to classify it as undrinkable.

Notwithstanding it believes that very probably this water will serve for [illegible] to work with at any rate to [illegible] the original service which might likely be made of it, many other uses may yet be obtained, either for gardening or for domestic use, this is incontestable.

Dr. Hermán Burmeister—Chairl, E. Pellegrini, Michell Puigpari, John Coghlan.

July 1st 1860.

Let it be published.

COSTA.

Chamber of Senators.

Session of Thursday.

Dr. Alsina said: After the observations it is evident we must [illegible] to the capital to enact [illegible] the question will cause endless [illegible] It is urgent some measure [illegible] from the Province [illegible] in the Legislature [illegible] Why not [illegible] Municipality [illegible] Nobody can [illegible] Not! And if it be [illegible] nothing is gained [illegible] [illegible] [illegible]

Spain.

Queen Isabella is approaching her confinement. Marshal O'Donnell has not defined his policy very clearly in the Mexican question: he has nominated his late competition is arms, Gen. Echagüe, of the African campaign, Capt. Gen. of Manilla. A flotilla of 4 war steamers has been ordered to South America. We learn that General Serrano has sent a commander to supersede Prim, Count of Reus, who retired, with the English fleet, from Vera Cruz. The Spanish army, just arrived from Tetuan, counts 633 officers, 19,000 men, and 1300 horses, and brings 20 million reals of Moorish indemnity. The Duchess de Montpensier is about to give birth to another Bourbon.

LOCAL EVENTS.

Western Railway.

The report of the Company for the month of May ultimo offers the following figures.

Passengers on the line	30,243
Value of their fares	$ 201,617
Freight on cargo	81,494
Expenses during the month	196,326
Nett proceeds	76,785

THE MENAY —Owing to the bad weather this steamer it appears could not leave Montevideo until last evening.

She is due to-day and returns this evening.

SHEEP SEALS.—The period having expired for renewing the boletos for sealing, we understand that the Government intend to extend the time until the 1st October; this would be only right and proper, as the roads are so bad, and the horses so thin that it is perfectly impossible for many of the sheep farmers to leave their places.

OPERA.—We read in an Italian paper that Mdlle Solon a native of Montevideo has made her debut in La Scala, Milan.

WESTERN R. R. Co.—A neatly got up blue book has been presented to us by one of the Stock-holders of the R. R. Company, we do not find time to get through it yet but do not doubt at all that before we finish it, we shall be convinced the Stock is worth $500 per cent above par.

STEAMERS.—The Espigador is due to-day from Rosario.

The Paysn is due to-day from Rosario

The Libertad leaves this evening for Montevideo.

POLKA.—To day we understand the manager of this establishment will be appointed.

PODCASTERA.—We understand this opera will be re-produced some evening this week. Those who purpose seeing it should buy the libretto on sale at Colon. We defer a review until to-morrow morning. An apology is due to the orchestra, as we are told by the highest authority that they acquitted themselves creditably on Sunday evening.

STEAMER CONSTITUCION.— This vessel has been hired by Sr Canseras who intends to commence running her between Buenos Aires and the Uruguay ports.

MUNICIPALITY.—As usual no quorum. We understand future meetings should be convened with the cautical P. S. Weather permitting.

BRITISH HOSPITAL.—We published yesterday the replies to the charges made against this institution, which were the more singular as being advanced by Englishmen subscribers to the hospital. It appears their assertions regarding the stove are false, and if it cannot be proved that there is color to the 19,000 dollar stove, we must believe that our columns have been turned to private purposes of jealousy.

POSTAL DELAY.—Yesterday we received our papers from Europe, brought by French packet. This is too bad.

IRISH IMMIGRANTS.—We learn that the Raymond from Dublin brings 200 passengers, who may be expected next month.

On Change.

July 2nd 1862.

To-day everything was dull—even ounces were devoid of animation, opening and closing at 424 1/2.

Owing to the wet and muddy state of the plaza—there were no sales whatever—country produce effected—buyers do not even go near the plazas, and holders are compelled to suffer all sorts of inconveniences from the weather, the carmen and the commissaries. A small quantity of mixed wool, lying in the station, was sold at $36.

We notice considerable arrivals of wheat—the reason by the train; which must with immediate sale at current rates.

The slight improvement in the European wool markets has as yet no perceptible effect here, although the holders of domestic wool show every disposition to realise.

On change to-day little was talked of, save politics and the weather: bus ness may be fairly said to be a stand still the importers complain, but collections are not erable and that to effect sales goods must be put under the auctioneer's hammer.

Last week's corn sale by one of our leading importers, was effected by auction, to the extent of one million currency prices we understand were rather good.

Trade auction sales, although in some places very successful, can never be regarded here in any other light than forcing the market, and must be attended (when bona fide) with considerable risk to the importer.

The Government proposal in reference to extending the Buenos Aires Custom House regulations to all the provinces meets with the approval of most men of business, but the foreign merchants in some Argentine provinces object on grounds of complaint against the insufficable method of doing business in the Custom House in Buenos Aires.

Money is rather abundant in the sole which is present, and prospects of a fine investing in such tempting securities as gas and Western Railway shares find a difficulty in employing their surplus funds, except by deposoiting in the Bank.

We remark that latterly a good deal of paper A No 1, is being discounted outside the Bank, this is a good healthy sign in our money market, for it clearly proves that the Bank monopoly is falling by degrees.

The new English Bank, which we noticed was in process of formation, is as yet in Statu quo

ARRIVALS AND IMPORTS
